# GRID RESILIENCE STATE AND TRIBAL FORMULA GRANTS: MICHIGAN

As states, tribes, and territories face threats from severe weather, the **Grid Resilience State and Tribal Formula Grants** will distribute **\$2.3 billion** over five years to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate crisis. The first round of funding applies to fiscal years 2022 and 2023.

In support of President Biden's Investing in America agenda, in June 2023, the U.S. Department of Energy awarded **\$14,934,332** to **Michigan** via the Grid Resilience State and Tribal Formula Grants program, which is supported by the Bipartisan Infrastructure Law.

State awards are based on a formula that includes factors such as population size, land area, probability and severity of disruptive events, and a locality's historical expenditures on mitigation efforts. Under the administration of the Michigan **Department of Environment, Great Lakes, and Energy**, Michigan will hold a competitive selection process to identify projects for which the roughly \$15 million in federal funding will be deployed.

## GOALS INCLUDE

- › Investing in last-mile delivery solutions for low-income customers.
- › Mitigating risk of severe weather on critical facilities through traditional grid hardening resilience investments.
- › Growing Michigan's skilled workforce for grid resilience activities.
- › Supporting microgrids and other innovative non-wired alternative projects.
